

Cardeovis Technologies Ltd. Surgeon Laser Machine

Vision

- To provide an efficient, innovative, accurate, high quality patented product for median sternotomy.

The Core Issue

Median sternotomy is that, until now the procedure is conducted mostly with a saw, leading to long recovery times, prolonged chest pain and a high complication rate

The Product

Surgical instrument for operating room including:

- Optical module
- Control Module
- Auxiliary HW and SW

Market

- Estimated at ~\$22B

Competitive Advantage

- Accurate surgical cut
- Recovery time is dramatically reduced
- Minimized pain
- Lower complication rate
